Core Systems offers rugged servers, edge systems, and displays designed for extreme temperatures, vibrations, and corrosive environments. Our solutions support reliable data integrity and continuous ...

Explore rugged rackmount servers from Core Systems, built to meet MIL-STD-810G, MIL-STD-461F, and MIL-S-901D for mission-critical performance.

ST6900UX-4H by Sungrow provides high efficiency, proven reliability, and advanced features to meet diverse clean energy needs.

2.4 MW PCS skid in one 20 ft container Modular design for reduced O& M costs, easy to expand Outdoor design, NEMA 3R rated for application in different environments.

Designed for tactical mobility and operational flexibility, ToughCase provides the ultimate protection for. The Tough Rack series is the ultimate rugged server rack for marine & land programs. Rugged, ...

The 5MW/10MWh Immersion Liquid-Cooling ESS is a next-generation utility-scale energy storage solution that integrates cutting-edge safety and efficiency. By immersing the battery in thermally ...

Our products have been used for integration into oil and gas machines that require highly reliable and rugged edge controllers, servers and gateway devices. They are used to manage critical operational ...

Our rugged servers and workstations deliver high-performance computing, data storage and cyber protection for seamless, real-time communications and networking, weapons control, situational ...

Mercury's lightweight & compact rugged rack servers employ cutting-edge technology to tackle the most challenging workloads in remote environments.

A scalable battery server combines modular architecture with adaptive power distribution, allowing capacity

10MWh Server Rack for Oil Fields

expansion from 100kWh to 10MWh. Key components include NMC or LFP cells, AI-driven ...
