Where can a portable power container be used?

The MOBIPOWER portable power container can be used virtually anywhere on the planet and will produce and store all the power you will need.

Where are solar power plants made?

Headquartered in Shanghai with 50,000m²+ production bases across Jiangsu, Zhejiang, and Guangzhou, the company employs 1,000+ professionals, including 20+ engineers driving energy storage technology. ISO/TUV/CE-certified units deliver rapid-deploy solar power for off-grid, emergency, and mobile applications, reducing emissions by 70% vs diesel.

Which solar panels do you use?

We use the highest quality solar panels, including LG, Peimar, and Canadian Solar; these solar panels harvest the sun's power and store the energy in high-quality lithium batteries, controlled with an external BMS. Then the power is distributed using Victron Multiplus units, so this inverter/charger can transfer the power.

Why do you need a solar container unit?

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.

This modular approach suits large construction sites, remote mining operations, and temporary microgrids. As project power requirements grow, additional containers deploy without modifying ...

The Guinea Mining Camp Application presents a 1MW Foldable Solar Container Solution. It aims to supply reliable renewable energy for remote aluminum mining operations in Guinea with grid ...

Highjoule successfully deployed a 1MW foldable photovoltaic container off-grid system at the Madina aluminum mine camp in Guinea, providing stable and clean electricity, replacing diesel generators ...

Handover of the system took place at our site in Hombourg, with a charge simulation and a well-documented manual. This was enough for the solution to be set up in Conakry, in Guinea. Delivery of ...

15MWh Off-Grid Solar Container Used at Construction Site in Guinea

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.

Comprehensive guide to solar power containers covering system components, applications, sizing, installation, costs, and benefits for off-grid power, emergency backup, and ...

Discover our Solar Container Solutions offering portable, efficient solar power units ideal for off-grid sites, emergency power, and remote locations. Easy to deploy and eco-friendly. Power your projects ...

Our foldable solar containers combine advanced photovoltaic technology with modular container design, delivering rapid-deployment, off-grid renewable energy with industry-leading efficiency.

We have deployed Solar Power Container units at three of our mines and the results have been outstanding. The ease of transportation and short installation time saved us weeks of downtime.

This project plans to construct an off-grid photovoltaic-storage system to meet the electricity needs of the Guinea aluminum ore camp. Guinea has abundant solar resources, with an annual horizontal total ...
