-----

Northern Thailand's energy storage project in Chiang Mai marks a turning point for renewable energy adoption across Southeast Asia. Announced last month, this initiative aims to solve the region's ...

To address this, the Electricity Generating Authority of Thailand (EGAT) has developed Energy Storage System (ESS) to provide backup when the sun is not shining or the wind is not blowing. This article ...

Thailand may lack the Battery Energy Storage Systems (BESS) necessary to navigate supply and demand challenges. The 2024 PDP draft included 10,000 MW of BESS, but this may see ...

while you're sipping coconut water on a Phuket beach, Thailand's engineers are busy building floating solar islands and next-gen batteries that could power entire cities.

Although Thailand is a regional leader in renewable energy, its use of energy storage is nascent. EGAT undertook some studies on the potential for energy storage and is piloting three battery energy ...

With Thailand's plan to increase renewable energy share to 30% by 2037, the northern region alone will require an additional 5GWh of energy storage capacity, presenting tremendous market potential. The ...

The increased solar and energy storage targets could sustain the forecasted electricity demand increase from data centres and EV charging in the coming years.

Energy storage is in its infancy in Thailand, and new business models are already emerging. As the regulatory framework adapts to accommodate new players in the market, it is ...

With ongoing deployment of variable renewable energy technologies, such as solar and wind power, the opportunities for energy storage projects will increase. Long-term plans to liberalise ...

Thailand's 2024 plan increases renewable energy, highlighting crucial battery storage systems for buildings
