Who makes outdoor Telecom cabinets?

Since 1989, we've manufactured outdoor telecom cabinets in America's Heartland, providing telecommunications companies, utilities, and network operators with BABA-compliant solutions that protect critical equipment from the harshest environmental conditions.

Why do oil and gas field communications need high capacity wireless networks?

Oil and gas field communications require reliable and resilient, high capacity wireless networks that operate over large areas under extreme environmental conditions.

What is a wireless Oil & Gas Communication Network?

Ideally, wireless oil and gas communication networks deliver broadband speeds and form a scalable foundation to securely support multiple applications that increase operational efficiency and safety on one cost-effective physical infrastructure.

Why is telecommunication important in the oil & gas industry?

Telecommunication projects in the oil and gas industry are often large, complex and remote, requiring a wide variety of systems and sub-systems. When multiple suppliers are involved, responsibility becomes fragmented and the risks of complications, delays and cost over-runs are greatly in-creased.
