The Biskra Photovoltaic Power Station, constructed by the company, has successfully completed pre-grid-connection acceptance, becoming the first project within this large-scale cluster ...

Led by engineering companies Maire Tecnimont and Baker Hughes, the project will involve the construction of three gas boosting stations and an upgrade to the gas field's gathering ...

ALGIERS, April 22 (Xinhua) -- Power Construction Corporation of China (PowerChina) on Monday started the construction of a photovoltaic power plant in northern Algeria, with a total ...

The Oran Energy Storage Demonstration Power Station represents a pivotal step in Algeria's renewable energy transition. Located in a region abundant with solar and wind resources, this project integrates ...

The Hassi R'Mel hybrid power plant combines solar and gas energy and has a total capacity of 150 MW. The Touggourt Solar Power Plant, completed in 2023, has an installed capacity of 30 MW.

Algeria is taking a major step in its energy transition with the construction of an 80 MW solar power project in Al-Abadla, Bechar province.

From reducing curtailment losses to enabling renewable energy exports, the Algeria Oran project illustrates how strategic energy storage deployment can transform national power systems.

In the heart of the Sahara Desert, Algeria is embarking on an ambitious journey to transform its energy landscape through a massive solar power project. This initiative not only ...

Over these years, POWERCHINA has undertaken a total of 26 projects in Algeria, covering a wide range of areas including dams, irrigation, municipal infrastructure, civil engineering, grain storage, ...

Algeria completes construction of energy storage power station

Scheduled for completion within 16 months, the project is set to generate over 600 jobs during construction, boosting local economic growth and advancing Algeria's renewable energy goals.
