This article aims to reduce the electricity cost of 5G base stations, and optimizes the energy storage of 5G base stations connected to wind turbines and photovoltaics.

Relevance to U.S. National Security Sino-Argentinian Relations: Dangerous Reliance? U.S. and China Engagements in Argentina The bigger conversation at play here is China's increased engagement with Latin America and what implications this will have for future U.S. interests in the region. Beijing has taken notice of the gradual U.S. withdrawal from and neglect of its southern allies. The "America First" foreign policy approach to international relations, and the renegin...
