-----

The launch of the glass plant is expected to create hundreds of jobs, meet domestic demand for glass containers, and facilitate exports. The use of local raw materials will reduce ...

The quality of the plant's output has been certified by Germany's Horn Glass Industries, as well as Italy's Vetromeccanica and Bottero. During the inauguration, President Berdimuhamedov ...

The project uses bifacial solar panels--a first in Central Asia--that capture sunlight from both sides. These panels generate 15-20% more energy than traditional models, crucial in Ashgabat's dusty ...

The Ashgabat pilot project is turning heads faster than a Turkmen camel race, blending Soviet-era infrastructure with 21st-century battery wizardry. Let's unpack why energy experts are calling this ...

Ashgabat, the "City of Love" in Turkmenistan, now shines brighter with flexible photovoltaic panels reshaping its renewable energy sector. These bendable solar solutions adapt to curved surfaces and ...

The launch of the glass plant is expected to create hundreds of jobs, fully meet domestic demand for glass containers, and pave the way for exports. The use of local raw materials reduces production ...

Solar energy is booming, and photovoltaic glass is at the heart of this revolution. The Ashgabat Photovoltaic Glass Factory has emerged as a key player, blending advanced technology with ...

The Abu Dhabi plant will feature automated and intelligent production lines using world-leading coating technology. The new facility is expected to begin operations in late 2026, supplying ...

Upon operational launch, the facility will produce over 5 million square meters of coated, laminated, and insulated glass annually. This output will supply construction and infrastructure ...

This marks the realization of the project for the innovative glass factory completed in July 2025 in Ashgabat,
