Where is the Aurora solar energy project located?

The project is to be located approximately 30 kms north of the town of Port Augusta on a vast pastoral station. The Aurora Solar Energy Project brings the most advanced power generation technology to South Australia, supporting its energy security and carbon reduction objectives.

What is the Aurora Energy Project?

The Aurora Energy Project (Aurora) is about developing a hybrid renewable energy power plant near Port Augusta in South Australia's Upper Spencer Gulf. A 50-50 joint venture between 1414 Degrees and Vast, this project brings together two leading Australian energy innovators.

Where is the Aurora power plant located?

The Aurora power plant is to be located on a vast pastoral area adjacent to the Stuart highway, approximately 30km north of the town of Port Augusta. Proximity to the highway makes it highly accessible during construction and operation.

What is the Aurora Energy precinct?

The Aurora Energy Precinct (Aurora) is a planned renewable energy park near Port Augusta in South Australia's Upper Spencer Gulf. A 50-50 joint venture between 1414 Degrees and Vast Solar, this initiative brings together two leading Australian energy innovators.

Other names: Vast Solar Port Augusta Concentrated Solar Thermal Power Project (Phases 2, 3), VS1 (Phases 2, 3) Aurora Energy Project solar farm is a solar photovoltaic (PV) and ...

SolarReserve's \$650 million Aurora solar thermal power station project has been granted development approval by South Australia's State Government.

SolarReserve has received development approval for its Aurora Solar Energy Project, a key milestone required to build the landmark 150MW solar thermal power station 30km north of Port ...

These negotiations are in progress. In the longer-term, Aurora also provides the opportunity to deploy: 150MW Concentrated Solar Power (CSP), using Vast Solar's proprietary technology and Aurora has ...

Aurora Island Solar Power Station

The Aurora Solar Energy Project located near Port Augusta is a 150 megawatt solar thermal power station incorporating 8 hours of storage (1100 megawatts-hours).

Aurora Solar Thermal Power Project was a planned solar power tower solar thermal power plant to be located north of Port Augusta in South Australia. It aimed to generate 150 MW of electricity upon ...

ADELAIDE, Australia-(BUSINESS WIRE)-SolarReserve has received Development Approval for its Aurora Solar Energy Project, a key milestone required to build the landmark 150 ...

Project Aurora combines battery storage with Aurora solar energy to deliver clean, reliable power to South Australia's electricity grid.

The Aurora Project located near Port Augusta is a 150 megawatt solar thermal power station incorporating 8 hours of storage (1100 megawatts-hours). Under normal operating conditions ...
