The award of a 14-year LTESA by the Australian Energy Market Operator Services under the NSW Roadmap Tender Round 5 for Long Duration Storage underpins the project's role in bolstering ...

Australia's clean energy transition has reached an important milestone. Five ARENA-funded large-scale battery storage system (BESS) projects, equipped with grid-forming (GFM) ...

The company says its latest, "record-breaking" energy storage plant is a blueprint for how to efficiently combine solar generation and storage to create a more resilient and decarbonized grid.

By enabling large-scale, grid-forming storage projects like Eurimbula, SMA Australia and Elements Green are helping to shape a resilient, reliable, and renewable energy system--ready to ...

In this edition, we sat down with two leading voices in Australia's circular economy for renewable energy: Katharine Hole, CEO of the Association for the Battery Recycling Industry (ABRI), and Megan Jones, ...

It is expected the project will feature Tesla's new Megablock technology, marking the world's first deployment of the grid-scale battery architecture unveiled earlier this year.

Australia's energy transition is gaining "real measurable momentum" with the market operator reporting a record wave of new solar, wind, and energy storage projects are progressing...

Battery energy storage systems (BESS) equipped with grid-forming inverters have emerged as essential components for maintaining system stability in Australia's National Electricity ...

Octopus Australia is cementing its reputation as one of the most active investors in Australia's renewable energy sector, today announcing an additional two new development projects ...

Australian energy storage project grid side

Australia has a massive pipeline of grid-scale battery energy storage projects. 16.5 GW of new battery projects could arrive in the NEM in the next 3 years.
