---

In 2020, Austria had a historically grown inventory of hydraulic storage power plants with a gross maximum capacity of 8.8 GW and gross electricity generation of 14.7 TWh. This storage capacity has ...

For the first time, an analysis shows how much storage capacity Austria needs on its path to 100% renewable electricity by 2030 and climate neutrality by 2040. Battery storage systems are ...

The results indicate the feasibility of achieving a fully decarbonized energy system in Austria through suitable policy measures and expanded renewable generation, with long-duration ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage into regional ...

Austria quadruples subsidies as demand for solar and battery energy storage systems soars, adding 218 MW PV and 200 MWh storage capacity.

A study 1 carried out by the University of Applied Sciences Technikum Wien, AEE INTEC, BEST and ENFOS presents the market development of energy storage technologies in Austria for the first time.

Austria's Climate and Energy Fund has launched a EUR17.9 million tender program for medium-sized electricity storage systems with net capacities of between 51 kWh and 1 MWh. The ...

The country's Climate and Energy Fund has launched a new call for proposals for "Medium-sized electricity storage systems" of between 51kWh and 1MWh in energy storage capacity. ...

In order to achieve the ambitious goal of "climate neutrality by 2040" in Austria, an integrated energy system must be created in which energy storage systems take on central functions.

# Austria is making energy storage equipment

Slovenia-based NGEN put Austria's largest battery energy storage system into operation. It installed it in record time - just seven months.
