Why should you choose energy storage cabinets?

This ensures that energy storage cabinets can provide a complete solution in emergency situations such as fires. To accommodate different climates, we provide professional recommendations based on customer usage scenarios and requirements.

Why are PPAs negotiated for buying Clean Power off-site?

That's why most PPAs are negotiated for purchasing clean power off-site. There are two main types of off-site PPA: physical and financial. Physical or 'sleeved' PPAs see an agreed volume of clean power physically transported from a renewable energy generator to a corporate buyer via the public grid.

Do energy storage cabinets need to be painted?

This ensures that energy storage cabinets maintain excellent appearance and performance, as well as resisting corrosion and UV radiation. We place particular emphasis on comprehensive pre-paint processes, including degreasing, cleaning and neutralisation, to ensure excellent paint adhesion and quality.

For standalone energy storage contracts, these are typically structured with a fixed monthly capacity payment plus some variable cost per megawatt hour (MWh) of throughput.

Best practice, and often a government legal requirement, is to use a Request for Proposals (RFP) for any solar or solar + battery storage contract. Example solar RFP templates are included in the ...
