Three utility scale battery energy storage projects co-located with solar plants were announced last week in Chile.

Section 3 provides an analysis of the current state of lithium in Chile, including its legal framework, a brief historical context, and the recent, under-development national lithium strategy.

International miners, car makers and battery firms are eager to secure supply of lithium, an ultra-light metal needed to power the shift toward electric vehicles. South America's "lithium...

To that part of the country - located 1,600 km north of the capital city of Santiago - members of the Santiago Center's team, Carla Magri, and Chris Molinari, traveled to get first-hand ...

Adding BESS to power generation companies' (gencos) capacity generation mix could help diversify energy sources and stabilize cash flows. However, the shorter useful life of BESS and ...

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable ...

In this sense, research on lithium ion batteries has become fundamental. Lithium-ion batteries have proven to have significant comparative advantages over other storage alternatives.

The ICCT-CMS report highlights the opportunity for Chile to transition from being an exporter of lithium to a Latin American center of electric vehicle battery production, contributing to ...

With increasing pressure to ramp up production, Chile's leftist president Gabriel Boric recently announced a state-led plan for the development of the country's lithium industry.

Battery research and development santiago

Who is BNamericas for? Address Chile: Alonso de Córdova 5870, Office 413, 4th floor, Las Condes, Santiago, Chile. (This address does not serve the public). BNamericas talks to Hernán ...
