-----

Read the latest research on everything from new longer life batteries and batteries with viruses to a nano-size battery.

We are a leading battery research institution focused on discovery and development of the next generation of battery materials and materials processing.

To address key bottlenecks--including limited model interpretability, inadequate alignment with electrochemical mechanisms, and real-world data adaptation challenges--we propose ...

At MITEI's Fall Colloquium, General Motors' battery development expert emphasized how affordability, accessibility, and commercialization can position the US as a leader in battery tech. ...

Accelerate your battery innovation with our industry-leading expertise in battery technology, material evaluation, and performance optimization.

Using unique instruments and facilities, scientists are studying battery materials from the atomic level sizes up to 7 Ah pouch cells, large enough to make market decisions yet small enough ...

Explore advanced QA/QC, cell manufacturing, and recycling solutions to maximize efficiency, reduce waste, and drive innovation in battery research and production. Learn from experts and access ...

Battery technology has advanced at extraordinary speed over the past decade, yet meeting the world's accelerating electrification needs will require both continued evolution of lithium-ion ...

The BDC leads the advancement and commercialization of cutting-edge energy storage technologies through collaborative research, rapid prototyping, and comprehensive testing services, fostering ...

Tired of slow battery development? Discover how Siemens and the FULL-MAP project are accelerating

# Battery research and development

battery innovation! We're adopting advanced modeling and simulation to achieve next ...
