Argentina has received more than 1.3GW of energy storage applications for its first battery energy storage system (BESS) tender.

Argentina's government said on Monday it has awarded contracts for 667 MW of capacity in its first tender dedicated to battery energy storage systems (BESS), exceeding its original 500-MW ...

Ahead and heading into a new era for new energy, it is expected that China's energy storage capacity and its BESS capacity in particular will grow at a CAGR rate of 44% between 2023 and 2027.

Argentina has taken a decisive step toward modernizing its power infrastructure, drawing international attention with its first large-scale battery energy storage tender.

The project involves installing BESS in key locations to enable rapid energy injection during shortages. These batteries will provide short-duration capacity, voltage control, and reactive ...

In February 2025, Argentina's Energy Secretariat, under the Ministry of Economy, initiated an international tender to integrate 500 megawatts (MW) of battery energy storage systems (BESS) into ...

Trina Storage, the energy storage arm of China's Trina Solar Co Ltd (SHA:688599), has signed new contracts to supply 1,203 MWh of battery energy storage systems (BESS) in Chile and ...

The first large-scale battery energy storage tender in Argentina is catching the attention of the international community as an unequivocal step towards modernizing power infrastructure.

The Argentine Energy Secretariat has received significantly more bids than expected for its public call to install large-scale battery energy storage systems (BESS) in the Buenos Aires ...

Bess battery storage in China in Argentina

The initiative aims to deploy 500 MW of battery energy storage systems (BESS) in the Greater Buenos Aires Area (GBA), but the submitted capacity has far exceeded ...
