A Battery Energy Storage System proposed for construction in Brighton at 35 Electric Ave. has generated a wave of resident backlash to underdeveloped regulation of BESS facilities, which ...

Renewable energy sources like solar and wind are not always available when needed. BESS step in to bridge the gap. By storing excess renewable energy, BESS ensure a steady supply even when the ...

A rendering of the proposed battery energy storage system by Mission Clean Energy in Blandford.

Project Boston is a large-scale BESS initiative currently under development in Lithuania. It's designed to store and dispatch energy on demand, a crucial capability as the country pushes to reduce reliance ...

Massachusetts is making a big push for batteries -- not the kind you put in a flashlight, but powerful, tractor trailer-sized batteries that store energy for the electric grid. State officials say...

The initial wave of projects will commence operations this summer, with four projects already under construction in the towns of Groton, Holden, and Paxton.

It requires investor-owned utilities to secure 5,000 megawatts (MW) of storage by 2030. This includes 3,500 MW of mid-duration, 750 MW of long-duration, and another 750 MW for multi ...

Successful projects showcased examples of future storage deployment, helped to grow the energy storage economy, and contributed to Massachusetts' leadership in clean energy innovation.

Massachusetts is initiating efforts toward its 2024 goal of procuring 5 GW of energy storage by 2030. A draft request for proposals (RFP) for 1.5 GW of 4- to 10-hour energy storage ...

The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy

Boston EK successful energy storage project

storage solutions in the United States to facilitate the transition to a clean energy economy.
