Electric utility company E.ON is building a new battery energy storage facility in Soroksár (part of Budapest), which will enable the connection of new solar systems and increase security of ...

Electric utility company E.ON is building a new battery energy storage facility in Soroksár (part of Budapest), which will enable the connection of new solar systems and ...

The project "Low-Carbon Investment in Budapest" fosters low-carbon investments in Budapest by exploring and promoting the possibilities of large-scale urban rooftop solar instalments.

Met Duna Energiatársulat, a unit of the MET Group, an energy company based in Switzerland with Hungarian roots, has inaugurated a 40 MW / 80 MWh battery storage at the ...

The new facilities will be fully integrated in the national grid, and are expected to double the current integrated storage capacity to a total of 146 MWh. The ministry also said winning bidders ...

Hungary's largest energy storage facility is currently under construction near Szolnok, with Chinese company Huawei involved in the solar energy project. The contract was signed in February, with ...

Hungary's renewable energy sector is witnessing a landmark project: the Budapest Energy Storage Photovoltaic Initiative. This article breaks down the construction sequence of this cutting-edge project ...

Hungarian Energy and Public Utility Regulatory Authority (MEKH) has added a requirement for battery storage capacity to accompany projects bidding in its newly-launched renewable energy tender.

The project is expected to be completed in the first half of 2025, contributing to the advancement of clean and efficient energy infrastructure in Hungary.
