---

Deploys solar + energy storage on all or most schools in the State. Reduces school operating costs, creating resources for teachers and students. Secures IRA tax credits to fund 30%, 50%, or more of ...

School districts can claim energy tax credits for solar energy, energy storage, and thermal storage projects. However, the new law shortened the timeline and placed new restrictions.

Our small, scalable footprint does not require cooling or ventilation, allowing storage to be installed in tight indoor or outdoor locations on campuses where space and safety are at a premium.

The SBUSD is a major school district that increasingly recognizes the value-of-resilience (VOR) and has embraced the Clean Coalition's vision to implement Solar Microgrids at a number of its key schools ...

By evaluating finance options thoroughly, schools can implement energy storage technologies that align with their budgetary constraints while moving towards sustainability.

Along with other large energy-using facilities like hospitals and hotels, secondary schools can realize strong lifetime savings for a combined solar plus storage project, the modeling for that ...

With a narrowing window and new rules, schools can still benefit from solar and storage, but should proceed with caution and seek out support from tax and legal professionals.

The ITC allows schools to claim up to 30% of the cost of eligible clean energy projects, including solar panels, geothermal systems, battery storage and wind or biogas systems.

Through the Investment Tax Credit, schools can receive a payment ranging up to 70% of the cost to purchase and install a solar energy system and up to 50% of project costs for battery storage or ...
