For an off-the-shelf solution, place your set on a rolling cabinet or casters, so you can wheel it out of the room into a closet or other storage space. That way, you can use the room for all ...

If you're wondering why your movie nights are an epic fail, you probably have your TV in the wrong place! Find out the common mistakes we often make when placing our set -- and how to ...

Rule number one of hiding your TV is not putting it right in the middle of the space, or above the mantelpiece, as this puts the TV far too high up in your living room hierarchy.

If you are wrestling with either reason, consider putting your TV in a cabinet or armoire with doors that can close. Make sure there are holes in the back (or drill some yourself) for all the ...

Since the TV needs to descend into the cabinet, and you'll also need some room for the motor, I would use a longer cabinet so that the components can be placed to either side of the TV ...

For home office setups, place your TV where it won't distract you while you work. Try a side wall mount or tuck the screen into custom cabinetry for some flexibility between focus and ...

Up to 24% cash back! Designing a room with a TV positioned in the middle can be a challenge, but it doesn't mean you have to compromise on style. When you think about interior ...

Yes, hiding! This Shelving & Storage Makeover demonstrates how you can cleverly conceal your TV inside a cabinet. With a simple push, the TV lifts from the cabinet transforming your ...

Here's a tv cabinet that was built in to the wall above the fireplace and covered with some bi-fold doors. This works nicely for my client and hides that big, black tv screen when not in use!

Can the TV storage cabinet be placed in the middle

Before you say it, yes -- there's a good reason why the bulky corner TVs of old fell out of fashion. Clunky TV cabinets used to greatly impede a room's floor plan; then, with the advent of sleek ...
