This 250kW solar + 631kWh energy storage system is a high-performance turnkey solution tailored for commercial and industrial users aiming for energy cost reduction, sustainability, and grid independence.

Integration of all energy storage system components, the output of which can be directly connected to the utility and photovoltaic systems. Multiple cabinets can be connected in parallel to realize the ...

The new CPS ESS solution integrates 125/250 kW two-hour energy storage building blocks that can be easily expanded to meet any C& I project size. Modular design minimizes the impact of faults and their ...

It adopts door-mounted embedded integrated air conditioning, which does not occupy cabinet space, improves the available space of outdoor cabinets, has better structural integrity at the ...

Self-learning new arc features with accurate arc fault detection via neural network algorithm, providing speedy arc fault protection with inverter shutdown in 0.5 seconds. Ensure fire safety and avoid risk to ...

Integrated Substations: Pre-installed box-type substations featuring compact structure, quick installation, energy-saving, and environmental protection, suitable for urban power grids, temporary power use, ...

Pilot Integrated ESS is highly combined with LFP battery system, BMS, PCS, EMS, liquid cooling system, fire protection system, power distribution and other equipment inside the cabinet. Provide ...

The HY-250kWh Indoor Rack Cabinet ESS is a high-capacity lithium iron phosphate (LiFePO₄) energy storage system designed for commercial and industrial applications. With a total capacity of ...
