Chinese storage providers aren't just exporting products - they're establishing new operational blueprints that European utilities are scrambling to adopt. With 56.5 GWh of global contracts secured ...

27.1 GWh of new battery capacity installed in 2025, marking the EU's 12th consecutive record year for battery storage deployment. 55% of all new capacity came from utility-scale systems, ...

As China's inaugural hybrid grid-forming energy storage project, it combines 10MW/20MWh lithium-ion batteries, 1MW/5min supercapacitors, and 200kW/400kWh sodium ...

The "Special action plan for large-scale construction of new energy storage (2025-2027)" was published last Friday (12 September), formulated jointly by the country's National Development ...

China's Sinopec and Denmark's Everfuel recently unveiled a hydrogen storage system that can power a mid-sized city for 72 hours using nothing but seawater and surplus wind energy.

China's cumulative power-sector energy storage capacity reached 213.3 GW by the end of 2025, up 54% year on year, according to data from the China Energy Storage Alliance (CNESA). ...

China's massive 30-megawatt (MW) flywheel energy storage plant, the Dinglun power station, is now connected to the grid, making it the largest operational flywheel energy storage facility ever built.

Energy After the mandate: China's energy storage sector one year on With clean energy projects no longer needing to be bundled with energy storage, companies are finding new ...

In a significant technological advancement, the country's largest "coal-to-power plus molten salt" storage project, located in Suzhou, east China's Anhui province, recently completed a ...

China-Europe 2025 Energy Storage Power Station

According to information shared at the forum, by the end of September 2025, China's new energy storage installed capacity had reached 103 GW, over 30 times higher than at the end of ...
