With the 15th BRICS Summit of leaders held in Johannesburg, South Africa on August 23, the world's attention was once again on South Africa. POWERCHINA has also been engaged in the construction ...

Powerchina has switched on a 100 MW solar tower in South Africa. The concentrated solar power (CSP) project will supply 480 GWh of clean energy to the country's power grid each year.

To harness its abundant sunlight and wind, South Africa needs renewable energy storage systems to store this clean power. The government must encourage companies to set up ...

As global energy grids become less reliable due to rising demand and aging infrastructure, people around the world are turning to solar power to keep their lights on. According to the New York ...

Thanks to swiftly falling prices of Chinese made solar panels and batteries, they now draw their power from the sun. These aren't the tiny, old-school solar lanterns that once powered a...

The deal was inked in Johannesburg, where the Solar and Storage Live Africa 2025, one of Africa's largest renewable energy exhibitions, is currently taking place.

Chinese solar equipment has been flooding African markets, partly as a ripple effect of the US-China trade war. It's one of several factors helping the continent gain traction with...

Hybrid wind-solar battery swapping stations with battery storage systems to store the power generated are technically and economically feasible. Few people drive electric vehicles in South...

Independent power producer Globeleq has partnered with Chinese energy storage giant Sungrow to deliver a 153MW/612MWh utility-scale battery project that promises to redefine how the ...

China solar power to battery in johannesburg

In a bid to stem the crisis, last year power utility Eskom selected Pinggao to install 60 MW of solar PV in two phases and large-scale batteries with a capacity of 1,440 MWh per day in 12 sites ...
