---

In conjunction with 5G NR, private base stations (BS) can support connectivity for different spectrum bands (sub-GHz, 1 to 6 GHz, or mmWave). The 5G base station products must pass all of the test ...

5G equipment, whether it be mobile devices or base stations, meet the same safety standards as the equipment used in previous networks.

With wireless communication standards such as LTE and 5G, the emphasis on higher data rates and spectral efficiency has driven the wireless original equipment manufacturers (OEMs) ...

Release 15 specifies 5G phase 1, which introduces a new radio transmission technique and other key concepts such as an industry-grade reliability, an extended modularity, or a faster ...

DSS (Dynamic Spectrum Sharing) functionality can be added to for a certified Base Station operating with LTE B5 and the 5G NR n5 bands. DSS addition does not require operational changes in such as ...

This article described the basics of 5G and introduced two MPS parts -- the MPQ8645 and MP87190 -- that can be used to improve the AAU or BBU architecture within a 5G base cell station.

Explore 5G measurements for User Equipment (UE) and Base Stations (BS), covering transmitter and receiver test scenarios, conformance, and network stability.

The present document establishes the minimum RF characteristics and minimum performance requirements of NR and NB-IoT operation in NR in-band Base Station (BS).

The Finnish Transport and Communications Agency Traficom has revised its regulation on critical parts of communications networks. The revised regulation extends the scope of regulation ...
