What is a base station Radio?

Base station radios are located in fixed positions, such as public safety answering points or dispatch centers, and tend to have the most powerful transmitters. A network is required to connect the different base stations to the same communications system.

What is an in-building emergency responder Communications Enhancement System (Erces)?

An In-Building Emergency Responder Communications Enhancement System (ERCES) is a wireless communications system used by first responder and emergency services personnel, such as police, fire, emergency medical, homeland security, and disaster response agencies.

Do public safety agencies use digital radio?

These analog radio systems were primarily designed for voice communications. Today however, many Public Safety agencies utilize digital technology that includes additional frequency bands, such as 700MHz and 800MHz.

What is EMS & how does it work?

Unique to the DoD, EMS personnel trained both to community standards and specialized levels of care deliver EMS in forward deployed and hostile areas, including in combat and combat support.

Study with Quizlet and memorize flashcards containing terms like base station, biotelemetry, cellular telephones and more.
