Energy storage system is a complete, self-contained battery solution for large-scale marine energy storage. The batteries and all control, interface, and auxiliary.

KRON represents anti-corrosion coatings for lighthouses, fuel terminals, sea locks, containers, floating cranes, and other objects which are used as port infrastructure.

Discover our Container Energy Storage System offering high-capacity, modular, and scalable energy storage ideal for renewable energy sites, microgrids, and backup power.

Legacy Building Solutions build and manufacture corrosion-resistant fabric buildings for ports and port storage applications.

Every TLS modular container is built on a fully welded steel frame, ensuring exceptional structural strength and resistance to impact. Through precision welding and strict quality control, we ...

For ports interested in electricity storage (for example, to reduce the peak load on their local distribution network) it is important to assess the different storage technologies available against their through ...

We work with our customers to create your corrosion resistant photovoltaic PV distribution boxes with easy access and egress of lines and cables without bends and tension.

We provide walk-in/non-walk-in energy storage containers, liquid cooling cabinets, marine energy storage containers and various non-standard energy storage products. Meet the requirements of ...

Explore innovative shipping container energy storage systems for sustainable, off-grid power solutions. Harness renewable energy storage effectively.

Corrosion-resistant energy storage containers for port terminals

Meet the salty superhero of ports: Maritime BESS Containers! They enable cold ironing (bye, ship emissions!), tame crane power peaks, & boost microgrid resilience.
