ARGUS offers flexible, innovative and simple to use equipment for the production of photovoltaic modules. Our machines are designed for specific production steps, enabling our customers to work ...

These machines automate the interconnection of solar cells using conductive adhesives or solder ribbons. For reliable electrical bonding, a minimum 15 kV DC power supply is required to activate ...

Equipment is made with high-quality hardware components and software. Each machine in the turnkey production line is optimized to ensure consistent output, quality, and increased productivity.

Solar PV Frame Processing Line including Long side Frame Machining Center and Short Frame Machining Center. Each Machining Center has separate Cutting section and Punching section.

We will help our customer start new solar panel factory, provide semi and full automatic solar panel making machines. And help the customer update the manual production line to full automatic ...

The automatic PV string welder is a fully automatic machine for welding PV solar cells. This equipment is the first step in the production line and one of the most important equipment in the whole PV module ...

Our automated recycling line processes panels at 1.5 tons per hour--that's over 60 panels every 60 minutes. The system handles both glass-glass and glass-backsheet configurations, ...

We will help our customers start a new solar panel plant, provide semi and full automatic solar panel production line. And help the customer update the manual production line to full ...

ConfirmWare is a leading and trusted provider of automatic machinery for solar panel production lines for local and international manufacturers. All equipment is optimized to perform the intended task ...

We offer a complete set of PV machines covering all solar manufacturing processes. We offer complete solar

# DC line machine for photovoltaic panels

panel production lines for global customers to manufacture photovoltaic modules based on their ...
