Consisting of row upon row of blue solar panels, a photovoltaic (PV) base with an installed capacity of 1 million kilowatts was put into operation in the Kubuqi Desert, Dalad Banner, Ordos city, ...

Now, Dalat Banner sand control and wind power photovoltaic integration project construction is in full swing, through the simultaneous implementation of photovoltaic sand control and supporting ...

An aerial drone photo taken on March 3, 2023 shows a photovoltaic base located in Dalad Banner in the city of Ordos, north China's Inner Mongolia Autonomous Region.

Since 2017, Dalad Banner has emerged as a pioneer in integrating large-scale photovoltaic (PV) energy with desertification control. To date, the project has reshaped ...

This giant photovoltaic power station takes advantage of the surrounding low vegetation and the color difference between the yellow sand to form a horse totem image. It has also been certified by ...

An aerial drone photo taken on Sept. 10, 2025 shows the Dalad Banner photovoltaic base in the Kubuqi Desert, north China's Inner Mongolia Autonomous Region. In the Kubuqi Desert, ...

The sun sets over solar panels at the Dalat Banner Photovoltaic Station. Views of the shimmering solar cells have gone viral online, as Kubuqi has become a popular domestic holiday destination.

The world's largest solar power plant ever built in a desert is currently under construction on the outskirts of Dalat. The conditions for the large-scale project are apparently favorable.

On March 25, CCTV-13's Morning News reported on the commencement of CECEP Solar's 500,000-kilowatt integrated photovoltaic (PV) desert control project in Dalad Banner, Inner Mongolia.
