An Off Grid solar Container unit can be used in a host of applications including agriculture, mining, tourism, remote islands, widespread lighting, telecoms and rural medical centres.

Our photovoltaic container solutions including 20ft/40ft containers, custom mobile containers, commercial and industrial energy storage systems are engineered for reliability, safety, and efficient ...

A solar power container is a self-contained, portable energy generation system housed within a standardized shipping container or custom enclosure. These turnkey solutions integrate ...

With integrated remote monitoring and diagnostics, our containers offer maximum energy independence and operational reliability. Before shipping, all systems are pre-assembled, tested, and pre ...

From initial system design to ongoing maintenance and optimization, GETON CONTAINERS ensures your solar energy solutions perform at peak efficiency throughout their lifecycle, with 24/7 monitoring ...

The system provides a discharge capacity of up to 80 kW and supplies connected consumers even when there is no sunshine. If you need more power for your application, you can simply increase the ...

Why should you choose a modular solar power container? Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power ...

The typical ROI for a Solarfold(TM) container is achieved within 3-5 years. This is based on energy cost savings of up to 70% compared to diesel generators, reduced maintenance costs, and potential ...

Standard solar container models can be manufactured and ready to ship in as little as 4-6 weeks. Customized configurations can take up to 8-10 weeks, with shipping times varying by destination.

Delivery time of 80kWh photovoltaic container

Fold & Go PV containers provide resilient, space-efficient solar energy for remote operations, disaster response, and off-grid applications. Learn how our 1MW Guinea mine case ...
