Find out the cost of solar panels, including installation and maintenance. Get insights into pricing and savings for switching to solar energy.

Based on our 2025 survey of 1,000 solar customers, the national average price for a single solar panel professionally installed is \$1,200. This means most full-size systems of between 20 and 30 panels ...

NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems.

Typically, a 6-8 kW system--suitable for an average 2,000-square-foot home--will cost between \$15,000 and \$22,500 before applying any incentives. However, after applying the 30% federal solar ...

Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems.

Is the price of solar panels falling? The price of solar panels has declined substantially over the last decade as the industry has matured and reached production at the largest global scale. Since 2010, ...

Your actual cost depends on your home's energy needs, roof ...

The U.S. Department of Energy's solar office and its national laboratory partners analyze cost data for U.S. solar photovoltaic systems to develop cost benchmarks to measure progress towards goals and ...

Installing solar panels costs \$2.50 to \$3.50 per watt and can increase your home's value, making it more appealing to future buyers. Always check for available incentives or tax credits, which ...

Solar panels are just 12% of the total cost of a solar panel installation. State and local solar incentives can significantly lower the cost of solar for some homeowners.

Direct cost of photovoltaic panels

Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in this guide.
