Telecom providers such as Claro, Altice, and Viva are leading the way in deploying 5G networks in the Dominican Republic. However, the coverage is still limited and concentrated in ...

Currently, 5G mobile services are commercially available in Puerto Rico, the U.S. Virgin Islands, Bermuda (included in the Caribbean for the purposes of this analysis), Aruba, the Cayman ...

Nationwide 5G is scheduled to launch in the Dominican Republic later this year, following the tender of frequencies in the 700 GHz and 3.6 GHz band.

The Government started today the 5G network as part of the present administration's broadband plan.

According to the established schedule, the nationwide deployment of the 5G band in the country would be on November 3, once the bidding, review, award, and contract process have been ...

All these trends - massive fiber buildouts, new wireless technologies and targeted social programs - suggest that the Dominican Republic's digital revolution is accelerating, increasingly ...

These data can be visualized by applying filters by technology (no coverage, 2G, 3G, 4G, 4G+, 5G) over a configurable period (only the last 2 months for example). It's a great tool to track the deployment of ...

The Dominican Republic is on the path to deploying 5G networks, with strong 4G LTE coverage already in place and a growing focus on the development of 5G infrastructure.

In the first days of December 2021, the operator launched its 5G service in 29 sectors of Santo Domingo and began 2022 by announcing an expansion plan that involved laying 230 new ...

Does China Telecom have a 5G base station at the Dominican Republic Airport

The 5G auctions will see spectrum sold across several bands, with nine 2×5MHz blocks of 700MHz spectrum available alongside 16 10MHz blocks of 3.5GHz spectrum. All concessions will ...
