---

From the end of 2023 to the beginning of 2024, the high-pressure cylinder of the steam turbine will be replaced to promote the matching of the power generation island with the solar island and the energy ...

As one of the first photothermal demonstration stations in China, this is the largest installed capacity photothermal power station in Dunhuang and also in Asia, where newer and advanced ...

China's largest photothermal power plant is spearheading a "new type of power system" in the country. The photothermal power plant in Dunhuang City of northwest China's Gansu Province ...

The first phase of an offshore photovoltaic (PV) power-generation platform built in the sea off Dongshan county, East China's Fujian province, started supplying electricity to the grid on Friday.

Near the western edge of the Gobi Desert, Dunhuang in Gansu Province is home to an innovative solar energy project. The Dunhuang 100-megawatt power plant stands out as the world's ...

The Gansu Dunhuang Solar Park is a 50- megawatt (MW) photovoltaic power station located in the Gansu Province, in China. All of the modules, which range from 230 to 240 watts, are mounted at a ...

This power station not only delivers a large amount of clean electricity annually, but also provides valuable technical experience and engineering demonstrations for the development of clean ...

The 100MW molten-salt solar thermal power plant, also called the "super mirror power plant" with its more than 12,000 heliostats, sparkles in the Gobi Desert in Dunhuang, northwest ...

Amidst the vast snowy landscape, a 260-meter-high solar tower gleams brightly on the desert dunes, located 20 kilometers west of the Dunhuang urban area. Viewed from above, this tower, surrounded ...
