THE SOLUTION nted a hybrid solution that integrates generator power with an advanced Battery Energy Storage System (BESS). This innovative omatically starting and stopping them as needed, ...

As the drilling rig gets deeper in the hole and power demands increase, the battery will automatically launch an additional generator while ofering continuous power, bridging warm up times to start an ...

enewable energy sources into electricity systems. While choosing an energy storage device, the most significant parameters under consideration are specific energy,

Energy storage systems are an important component of the energy transition, which is currently planned and launched in most of the developed and developing countries. The article ...

Return-of-investment might be expected within 20% of battery system lifetime. This paper presents the development of a rule-based energy management control strategy suitable for isolated ...

The hEMS upgrades any drilling rig into a hybrid rig, using CleanDesign battery energy storage and an automated engine management system to reduce the number of gensets operating.

Two jack-up rigs were retrofitted with Siemens Energy's BlueVault(TM) lithium-ion energy storage system. Initial data show that the low-emission upgrades in batteries, data monitoring, and ...

Engineered with a heavy-duty battery structure that provides vibration isolation, the Hybrid Energy Storage Solution is designed to protect against power failure, voltage sags/surges, and...

Patterson-UTI is equipped for the future of power with a suite of integrated energy solutions. We are a leading provider of natural gas fueling and handling for power generation, completions, and drilling ...
