What are the regulations relating to the use of electricity?

There are specific regulations in relation to the use of electricity. The regulations apply to many workplaces. The obligations apply at multiple levels. There are obligations on the manufacturers, suppliers, designers, installers, and suppliers of electrical equipment and installations.

What is the electricity storage policy framework for Ireland?

The Electricity Storage Policy Framework for Ireland was published in 2024. The policy clarifies the key role of electricity storage in Ireland's transition to an electricity-led energy system, supporting Ireland's 2030 climate targets. It is considered a stepping stone on Ireland's path to net zero carbon emissions.

What percentage of Ireland's Electricity is renewable?

In 2023, renewables accounted for 40.7% of Ireland's electricity supply⁴. Ireland has set targets to increase the proportion of renewable electricity to up to 80% by 2030, with targets of 9 GW from onshore wind, 8 GW from solar, and at least 5 GW from offshore wind energy by 2030. Building on the 2030 target, Ireland also has a gove

How will data centres affect Ireland's Electricity System?

ctricity is due to rise sharply as forecast¹ by our System Operators (SOs). Recent and sustained growth in Large Energy Users such as data centres is having an impact on the ability of Ireland's electricity system to meet reasonable demands, that is not comparable to any other sector or industry. The share of electricity consumed by dat
