What is Germany's EV policy?

This law created possibilities to prioritize and encourage the use of electrically powered vehicles in road traffic. Here are the key aspects of Germany's EV policy: The German government offers financial incentives to encourage the purchase of electric vehicles. This includes subsidies for both all-electric and plug-in hybrid vehicles.

What is Germany doing about electric vehicles?

Germany has been a leading proponent of electric vehicles, implementing a range of policies and initiatives to accelerate the adoption of electric vehicles in the country. The target goal by 2030 is to have up to 15 million EVs and 1 million charging stations according to the Climate Action Program 2030.

Will Germany's new electric vehicle subsidies have stricter eligibility restrictions?

BERLIN -- The German government's latest electric vehicle subsidies will have stricter eligibility restrictions than previous programs. Chancellor Friedrich Merz announced the purchase incentives for zero-emission vehicles on Oct. 9 as part of his government's broader effort to support the nation's ailing automakers.

Does Germany have a tax exemption for electric cars?

For years, Germany had direct financial incentives to encourage people to purchase or lease an electric car. When those ended abruptly in December of 2023, EV sales in Germany tumbled. But there has been an indirect subsidy in place for electric cars all along in the form of a tax exemption on new cars.

It's been confirmed that any new electric vehicle registered in Germany will be exempt from motor vehicle tax through December 31, 2035.
