What are solar rebates & incentives?

Rebates and incentives are a crucial way to encourage broader adoption of solar energy and full home electrification across the country. These incentives will typically come from your utility, state government, or the federal government in the form of tax credits, property tax abatements, one-time rebates, or performance-based rebates.

How do solar incentives work?

Lowering the cost of going solar helps more people in your community go solar, which supports clean air, a more resilient energy grid, lower energy prices, and lower fossil fuel emissions. Related: Solar Rebates by State
The concept of solar incentives is simple: Reduce the cost of solar to make clean energy accessible to more people.

Which states offer solar incentives?

Arizona, Hawaii, Massachusetts, New Mexico, New York, South Carolina and Utah offer personal tax credits to encourage solar installations. Other states, like Tennessee, West Virginia and Oklahoma, don't have any residential solar panel incentives at all. NOTE: Solar program statuses often change with new laws or funding.

Where can I find a solar incentive?

Odds are you can find at least one solar incentive through your state, local government, or utility company. But, some states go above and beyond to encourage homeowners to go solar. Did you find this page helpful?

Learn about the available solar rebates and incentives in your area. Current policies encourage broad adoption of solar power for homes and businesses.

Read on to learn about a few of the best companies in the U.S. that can help you design and install your very own off-grid solar system.

metering is one of the most important policies in home solar. It makes it so you benefit from having solar panels even when it's dark outside. When the sun's shining, your solar panel system usually produces more electricity than your home needs. If your state or utility company offers net metering, you can essentially use t...See more on energysage Email: support@energysage Published: Apr 9, 2024Occupation: Content
