Intelligent power management company Eaton announced the xStorage™ battery energy storage system (BESS) to accelerate decarbonization projects and maximize the impact of ...

This project will feature a 6-megawatt photovoltaic system paired with an 8-megawatt-hour energy storage system, exclusively utilizing domestically produced Megapacks.

This groundbreaking initiative marks the country's first utility-scale battery installation and is crucial for strengthening the national electricity grid and supporting the expansion of ...

The first delivery to what is expected to be the world's largest hydrogen production and storage facility has arrived in the U.S. This month 15 electrolyzers arrived at the site of the...

U.S. carmaker Tesla's new Megafactory in Shanghai, dedicated to manufacturing its energy-storage batteries, known as Megapacks, launched production on Tuesday, marking a ...

Covering about 200,000 square meters, the new energy storage project attracts a total investment of 1.45 billion yuan (\$200 million). Up to 10,000 Megapack units are scheduled to be ...

To that end, OE today announced several exciting developments including new funding opportunities for energy storage innovations and the upcoming dedication of a game-changing new ...

SHANGHAI, June 21 (Xinhua) -- U.S. carmaker Tesla on Friday inked a deal with Chinese partners to build a grid-side energy storage station in Shanghai using its Megapack energy-storage batteries.

By the end of December 2025, China's cumulative installed capacity of new energy storage technologies including lithium-ion reached 144.7GW, representing an 85% year-on-year rise.

The US\$50mn battery energy storage system will boost Honduras' grid.
