Executive Summary In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are ...

Emerging technologies like sodium-ion and flow batteries are rewriting the rulebook entirely. The 2023 Gartner Emerging Tech Report predicted we'd reach \$100/kWh by 2028. Well... they've had to revise ...

This report is designed to help stakeholders across the energy storage ecosystem understand pricing trends, evaluate investment opportunities, and navigate an increasingly complex ...

Global average prices for turnkey battery storage systems fell by almost a third year-over-year, with sharp cost declines expected to continue.

This report is grounded in leading technology and material platforms, and it incorporates vital data on input material price and supply outlooks, market bottlenecks, and demand analysis to support its cost ...

That downward-sloping line on your favorite energy storage price trend analysis chart isn't just pretty--it's reshaping entire industries. Take California's Moss Landing facility: their latest ...

The report also includes key quarterly trends and analysis on impactful market regulation, policy, system prices, and supply chain across all segments. The report provides industry ...

Each quarter, new industry data is compiled into this report to provide the most comprehensive, timely analysis of energy storage in the US. All forecasts are from Wood Mackenzie Power & Renewables; ...

DOE's Energy Storage Grand Challenge supports detailed cost and performance analysis for a variety of energy storage technologies to accelerate their development and deployment.
