Three of the most consequential U.S. grid operators moved this year to unclog interconnection backlogs and modernize battery participation. Southwest Power Pool (SPP) ...

A wave of 2025 policy moves just tightened foreign-entity-of-concern sourcing for batteries, right as Texas overtakes California on installed storage. We decode what changed, map ...

(ERCOT) region. Energy storage systems are emerging as essential assets for grid reliability and resiliency in ERCOT - one of the few wholesale power markets with a growing load base that faces ...

This new construct will prove more accurate price signals to generators and battery storage operators alike. At its core, RTC+B introduces true co-optimization of energy and ancillary ...

Another experienced battery owner in ERCOT said they are still bidding into ancillary services, but they expect that the new state-of-charge rules will reduce storage participation in those ...

Texas electricity grid and wholesale market operator ERCOT has voted to change the proposed NPRR (Nodal Protocol Revision Request) 1186, a decision which needs to be ratified by ...

A Battery Energy Storage Task Force was established in 2019 to identify key topics and concepts for the integration of Energy Storage Resources in ERCOT. The task force is developing Nodal Protocol ...

ERCOT's board of directors on Oct. 17 unanimously approved the new rule, known as NPRR 1186, requiring batteries to maintain a certain state of charge, or SOC, depending on which ...

Battery storage systems are subject to environmental laws relating to emissions, hazardous waste disposal, and chemical management. Safety standards are especially critical given ...

Stakeholders highlighted multiple items of contention they wanted altered (see Exhibit 1), particularly the

Ercot battery storage rules

performance standard, penalty structure, applicability to battery storage, and the ...
