-----

The EU installed 27.1 GWh of new battery storage capacity in 2025, a new record year powered by strong utility-scale deployment, according to SolarPower Europe.

The EU, UK, Norway, and Switzerland together are expected to reach 100 GW of installed energy storage later this month, according to new analysis launched on Wednesday by LCP ...

Welcome to our European Market Outlook for Battery Storage 2025-2029 Though the battery energy storage revolution continued to unfold across Europe in 2024, setting yet another annual installation ...

Discover all statistics and data on Energy storage in Europe now on statista !

Under the EU's flagship research programs, Horizon Europe and Horizon 2020, numerous energy storage projects are being funded to develop innovative, scalable storage solutions.

The main energy storage method in the EU is by far "pumped storage hydropower", which works by pumping water into reservoirs when there is an electricity surplus in the grid - for example ...

This report comes at a defining moment. In 2025, Europe's battery storage market entered a new phase of scale and maturity. With 27.1 GWh of new capacity installed, the European ...

Several developments have taken place recently as policymakers and industry acknowledge the potential role that energy storage is likely to play in future and the need to remove ...

Energy Storage Europe is currently involved in several EU-funded projects promoting research, innovation and demonstration in the energy storage sector. Our projects tackle a wide range of ...

The HAVEN EU Project is preparing to launch its pilot activities ? Our Hybrid Energy Storage System (HESS) will soon be validated under diverse real-world conditions. These pilots will ...
