Which frequency inverters are suitable for control cabinets?

No matter where you are in the world, our drives are your solution. We have developed the NORDAC PRO family of frequency inverters specifically for installation in control cabinets. These inverters are equally suitable for operating synchronous and asynchronous motors and meet all customer requirements thanks to a wide range of custom options.

How much power does a control cabinet inverter have?

Our inverters for control cabinet installation have a power range from 0.33 to 215 HP and can be customized with optional plug-in modules. Variable cooling solutions ensure optimum heat dissipation. Why Control Cabinet Inverters From NORD? High Performance NORD inverters for control cabinet installation provide high precision speed control.

How much power does a Nord control cabinet inverter have?

NORD control cabinet inverters have a power range of up to 215 HP and thanks to their wide range of functionality can be perfectly adapted to many customer applications. NORD Frequency Inverters already meet the requirements of energy efficiency classification IE2 of the new Ecodesign directive (EU) 2019/1781 (valid from 1st of July 2021).

What is a 600 VDC inverter used for?

Nova's 600 VDC inverters are currently being used by customers such as Chicago Transit Authority and Long Island Railroad for various applications like providing emergency power. These durable inverters are often used in subway applications.

Pixii MultiCabinet solutions are modular battery energy storage systems that scale to your needs. It comes with smart functionality like time shift and peak shaving to reduce your energy cost, and it's ...

We have developed the NORDAC PRO family of frequency inverters specifically for installation in control cabinets. These inverters are equally suitable for operating synchronous and asynchronous motors ...

ecification Sheet EvoCharge Power Cabinets are used with EvoCharge Power Stations and distribute charging power to as many as 6 or 8 charging outputs (charge ports) simultaneously depending on ...

European inverter cabinet 600kW

The PL600 600kW is fully configurable by the user and comes equipped, as standard, with a comprehensive suite of application blocks. Centre winding macros, spindle orientation and a fully ...

Modular rectifier cabinet, 300KW and 600KW optional, can be combined with ATESS PCS to form a DC coupling solution, suitable for large industrial scenarios.

Breuer Motoren GmbH offers control cabinet inverters designed for precise motor management. Improve your system efficiency and reliability.

OPUS Inverter Systems are robust, free convection cooled, N+1 redundant DC to AC power conversion solutions for critical infrastructure applications. Inverter systems can be integrated to OPUS Power ...

The transformer-isolated Galaxy Series Rugged Inverters are designed for harsh environment rail, work train, and trolley applications.

RTF power rating of 600kW. Rectifies and converts AC power to DC power. Provides 0ms change over time. Less power losses due to power conversion. Higher system efficiency. Highly efficient in ...

With BENNING's INVERTRONIC compact range of inverters, the company offers highly reliable, cost-effective, single-phase, modular inverter systems which provide high-quality, maximum-reliability ...
