Explore top U.S. wind energy projects launching from 2026, with insights on renewable trends, onshore vs offshore growth, and policy impacts on clean power.

Wind farms are no longer just about generating power - creating jobs, stimulating local economies and fostering a sustainable future are just some of their benefits. Energy Digital has ...

With a total installed capacity of 400 megawatts, the wind farm project will be able to generate 1.6 billion kWh of electricity annually, meeting the annual electricity consumption needs of 680,000 households ...

China is getting ready for the flight test of an airborne power generation system, which looks like an airship, and generates power like a turbine. The research team behind the project says...

China's first megawatt-level high-altitude wind power demonstration project successfully generated electricity on Sunday in east China's Anhui Province, said China Energy Engineering ...

Wind farms are no longer just about generating power - creating jobs, stimulating local economies and fostering a sustainable future are just ...

The first wind turbine of the 1.75 Million kW Wind Power Generation Project of Gansu Guazhou Baofeng Wind Power Development Co., Ltd. was successfully installed in Guazhou County, Jiuquan City, ...

The Jixi new technology high-altitude wind power generation demonstration project in East China's Anhui Province started operation on Jan 7, 2024. It is the country's first megawatt-level ...

China's first high-altitude megawatt-scale wind power demonstration project was connected to the state grid on Tuesday in Jixi County, East China's Anhui Province. The feat ...

Chinese scientists expect to soon make a breakthrough in airborne wind turbine technology, with the world's

# First-level wind power generation project

first megawatt-level system set to take flight, according to the project team.

Built by the China General Nuclear Power Group (CGN), the first 1 million-kilowatt project, which is a mountainous wind farm, is capable of generating more than three billion kWh on-grid electricity ...
