Where is FlexGen based?

The company is headquartered in Durham, North Carolina and was founded in 2009. FlexGen is the developer of the FlexGen HybridOS energy management system, which is capable of automating the dispatch of energy storage, renewable, and conventional power generation to provide enhanced capability and lower cost of energy.

Why should you choose FlexGen?

FlexGen provided superior trading performance and critical services when they were needed most. Unleash the full potential of your battery energy storage systems with FlexGen's best-in-class energy management system and analytics software. The brains behind your battery energy storage plant.

What does FlexGen do?

FlexGen designs, procures, constructs and integrates ESS projects for a turnkey solution. FlexGen's Lifecycle Services team can monitor, maintain, and upgrade your systems to ensure the integrity and longevity of your assets. "You're not picking technology or capex. You're picking a partner."

How does FlexGen EMS retrofit work?

FlexGen's EMS Retrofit solution future-proofs your investment with HybridOS EMS, designed with advanced and automated controls, near real-time monitoring, and AI-powered diagnostic features. We deliver utility-scale battery storage projects armed with HybridOS(TM), our best-in-class energy management software.
