-----

The Philippines Solar Energy Market is set for remarkable growth, expanding from 4.25 GW in 2025 to 5.43 GW in 2026, and is projected to soar to 18.49 GW by 2031 at a 27.78% CAGR ...

The Philippines has achieved a major milestone in solar energy adoption this year, with over 1.2 gigawatts (GW) of new photovoltaic (PV) capacity installed in the first half of 2025 alone.

A new solar mapping tool in the Philippines shows that the country's rooftop solar capacity exceeds 1.8 GW. Its creators say the platform can be used to track unregistered solar rooftop...

Flagship builds such as the Philippines' solar energy market-size-defining 3.5 GW Terra Solar and ACEN's 1,120 MW floating-solar program underline the region's dominance.

MANILA, Philippines, Feb. 4, 2026 /PRNewswire/ -- Holcim, global leader in innovative and sustainable building solutions, has signed a long-term Power Purchase Agreement (PPA) with ...

UK investment firm Actis has finalised its \$600 million investment in Terra Solar Philippines Inc., securing an equity stake in a ground-breaking GW-scale solar and energy storage project.

The Philippines has awarded 10.19GW of new energy capacity in its fourth auction round, with solar accounting for more than 6GW of capacity.

January 2025 marked a milestone as the Philippines signed renewable energy deals with Abu Dhabi-based Masdar during Sustainability Week. The agreements, covering up to 10 ...

The country's installed solar capacity reached 1.5 GW by 2024, driven by utility-scale projects like the 132 MW Cadiz Solar Plant and widespread off-grid systems in rural areas.

"The Philippines has three GW of utility-scale solar and wind in operation, which contributes 11 percent of the
