Georgia-based innovators have developed phase-change liquid cooling systems that maintain cells within 2°C of ideal operating temperatures. Unlike those clunky air-cooled cabinets, these solutions:

As Georgia Power continues to innovate and invest in battery storage, we are not only meeting the energy needs of today but also paving the way for a cleaner, more resilient, and more ...

In 2015, the Marine Corps Logistics Base (MCLB) in Albany, Georgia, beat back stifling summer heat with an advanced geothermal heat pump (GHP) project. Called a borehole thermal energy storage ...

An additional 1,000 MW of new battery energy storage is expected to be procured in the coming years through competitive bidding processes and a 13 MW demonstration project is in ...

Georgia Power has issued a request for proposals (RFP) to develop 500 MW of new battery energy storage projects, with systems required to provide at least two hours of discharge ...

Georgia Power recently announced that construction is underway for four new battery energy storage systems in strategic counties across the state to support energy capacity needs.

Watch the video to see how this project will boost grid reliability, fit into the Rockdale community with minimal disruption, and help meet Georgia's growing energy needs--safely and ...

As the world's leading provider of energy storage solutions, CATL took the lead in innovatively developing a 1500V liquid-cooled energy storage system in 2020, and then continued to enrich its ...

The state has quietly become a hotspot for energy storage companies, blending Southern ingenuity with cutting-edge tech. Let's unpack why Georgia's storage scene matters--for businesses, ...

The Center of Innovation assists businesses focused on energy storage in two primary ways. We work closely

Georgia liquid cooling energy storage

with Georgia's universities to identify cutting-edge research regarding energy storage and ...
