Which retailer has the most onsite solar power?

The store generates up to 10% more energy annually than it consumes, making it the retailer's first net-zero energy location. While Target may hold the crown for onsite solar installations, Walmart has the most staggering untapped potential among all American retailers.

Can a solar battery storage system benefit your business?

When solar generation and energy storage are integrated, businesses can maximize solar self-consumption by storing excess energy for use when generation is unavailable or insufficient. "A solar battery storage system ensures that your building can continue operating even when the grid goes down.

Should big-box retailers install solar canopies over parking lots?

While solar canopies over parking lots have long captured imaginations with their dual promise of shade and clean energy, big-box retailers are starting to think slightly bigger. Rooftop installations cost significantly less than parking canopies, deploy faster without disrupting customer traffic, and require minimal additional infrastructure.

How does global supply chain disruption impact the solar industry?

While the solar industry experiences rapid growth, global supply chain disruptions continue to impact the availability of solar panels and energy storage components, occasionally resulting in project delays and increased costs. The dramatic increase in U.S. manufacturing capacity is helping to ease these supply challenges.

Retail giants are beginning to transform their massive rooftops into renewable power plants by installing U.S.-made solar panels on hundreds of stores nationwide.

The GIANT Company recently announced a long-term renewable energy supply agreement with Constellation, a leading competitive energy and energy solutions provider, to power ...

On November 4, GIANT announced a long-term renewable energy agreement with Constellation, a leading energy and energy solutions provider, to power its Pennsylvania operations ...

Giant joins solar energy storage company

The Giant Co. has entered into a long-term renewable energy supply agreement with competitive energy and energy solutions provider Constellation to power the grocer's Pennsylvania ...

The GIANT Company today announced a long-term renewable supply agreement with Constellation to power its Pennsylvania operations including select grocery stores, fuel stations and ...
