Why is the Gobi Desert a great place for solar power?

This intense dryness, as well as the abundant sunlight of more than 3,000 hours a year, make the Gobi Desert an excellent environment for large-scale solar power generation. The incredible solar-thermal power station reportedly features two 656-foot-high (200 meters) towers, each surrounded by a vast field of 27,000 mirrors known as heliostats.

Where is China's new solar power plant located?

This new plant is designed to be cheaper and more efficient than traditional solar thermal power stations, making it a major step forward for renewable energy. The power station is located in Guazhou County in Gansu Province, in northwestern China.

Does China have a solar-thermal power station?

China has switched on its first dual-tower solar-thermal power station, using concentrated heat to generate power even after sunset.

What is China's first solar-thermal power plant?

China Three Gorges Corporation China has made a revolutionary breakthrough in renewable energy engineering after it just launched the world's first solar-thermal power plant that utilizes a dual-tower system to generate electricity in the Gobi Desert.

Last updated on October 9, 2025 China has just turned on a world-first solar thermal power plant in the Gobi Desert, a move that could change the way solar energy is produced. This new plant is designed ...

China just connected its largest single-capacity solar farm built on a former coal mining area, which is in the Gobi Desert, to the grid. The Mengxi Blue Ocean Photovoltaic Power Station, ...

Every time Liu Fuguo takes people on a tour of his company's power station in the Gobi Desert, he hears a lot of "wows". "Their reaction is the same as when I first came here," said Liu, ...

In a groundbreaking development, China has activated a solar thermal power station in the Gobi Desert, a project characterized as a more cost-effective and efficient application of the ...

Gongbei rooftop solar power station

Source: Science and Technology Daily On January 2nd, China Green Development Group announced that the 400-megawatt solar power project in Ruoqiang, managed by Xinjiang Zhonglv ...

I'm proud to be a part of the team safeguarding this power station," said Guo Dawei, deputy head of the PV power station in Fukang. The project is an epitome of China's burgeoning ...

This intense dryness, as well as the abundant sunlight of more than 3,000 hours a year, make the Gobi Desert an excellent environment for large-scale solar power generation. The ...

China has switched on its first dual-tower solar-thermal power station, using concentrated heat to generate power even after sunset.
