-----

The solar power push in Guyana is being supported under the Guyana Utility-Scale Solar Photovoltaic Program (GUYSOL), which is a program that sets out to build solar farms across the ...

Welcome to SolarOne Guyana, the leading provider of solar energy solutions in Guyana. We help homes, businesses, and government projects reduce energy costs and achieve energy ...

The government of Guyana has unveiled plans for three utility-scale solar parks in region ten of the country with a cumulative capacity of 15 MW.

With a peak capacity of 750 kilowatts (kWp), the facility integrates advanced photovoltaic modules, intelligent inverters, and robust battery storage. This hybrid system seamlessly ...

Guyana is set to significantly boost its renewable energy capacity by commissioning eight large-scale solar farms in 2025. This initiative is part of the government's broader strategy to ...

The general objective of the program is to support the diversification of Guyana's energymatrix towards the use of climate-resilient renewable energy sources in the electricity ...

The government is pouring tens of billions of dollars into Guyana's electricity system in 2026, signalling its most aggressive push yet to stabilise the national grid, expand generation and ...

In Guyana, solar energy is used for several purposes, including drying agricultural produce, irrigation, ICT, and to improve electricity access in rural areas. Under the Hinterland Electrification Programme, ...

By integrating 5 megawatts (MW) of solar generation with advanced storage technology, the system ensures grid stability and consistent electricity supply even when sunlight is unavailable.

Under the Guyana Utility Scale Solar Photovoltaic Program (GUYSOL), 8 Solar Farms are being constructed

# Guyana Solar Power Generation System

across Regions 2, 5, 6, and 10 for 33MWp. The Program is administered by the Inter ...
