Patrick Haverman, Deputy Resident Representative of UNDP Vietnam, stated that the report provides the most detailed offshore wind atlas to date, featuring high-resolution data and long ...

Significant wind power projects currently underway include the Phu Cuong Soc Trang Offshore Wind Farm, the La Gan Offshore Wind Farm, Bac Lieu Wind Power Phase III, Hoa Binh 5 ...

Vietnam has been building a roadmap for offshore wind power development which requires a long-term process, thorough preparations in human resources, infrastructure, and ...

This article aims to provide a high-level analysis of the offshore wind market in Vietnam, including its potential for development and regulatory framework.

Participation is via competitive application, and limited to utility-scale solar and wind power projects greater than 30 MW and with prior power development plan approval.

All LNG and offshore wind projects are expected to be completed before 2030.

The ambitious Power Development Plan 8 (PDP8), approved in May 2023, plans to increase the share of renewables (wind, solar, and hydro) to 46.5% by 2030 and reach Net Zero by 2050.

This article explores the current state of wind energy in Vietnam, maps out its resources, and discusses the challenges

Discover how hybrid energy systems, combining solar, wind, and battery storage, are transforming telecom base station power, reducing costs, and boosting sustainability.

Hanoi (VNA) - Vietnam is laying the groundwork to unlock its vast offshore wind energy potential, which

Hanoi desert builds communication base station wind power

could serve as a cornerstone for its green growth strategy and long-term climate goals.
