---

In a strategic move, Brazil has announced the reinstatement of import taxes on wind turbines and solar panels, signalling a shift in its approach to alternative energy sources.

From 2024 to 2027, photovoltaic modules assembled in Brazil will be subject to a 10.8% taxes on imported solar panels.

On Tuesday, the Brazilian government endorsed steps to increase import duties on photovoltaic modules and wind turbines, aiming to bolster the domestic production of renewable ...

Solar energy will remain a strategic component of Brazil's energy transition, but its competitiveness will increasingly depend on a new kind of innovation--legal, fiscal, and contractual. ...

Currently, 18.2 percent of Brazil's energy is obtained through photovoltaic panels. But now that could be under threat thanks to a decision by the Brazilian government to slap new taxes on ...

In 2025, there were significant changes in the taxation of solar energy in Brazil, as established by Law No. 14.300 / 2022, known as the Legal Framework for Distributed Generation.

According to the Brazilian Ministry of Industry and Trade, the government has rescinded the 12% import tax subsidy on photovoltaic components, as the country is also a producer of similar ...

The government revoked an import tax subsidy on assembled solar panels, as the country manufactures similar products, the industry and trade ministry said in a statement.

The double whammy of China's export VAT rebate reduction and Brazil's import tariff hike has created a perfect storm for solar traders. Imagine trying to parallel park while the parking meter rates keep ...

# Has Brazil refunded the tax on photovoltaic panels

The increase in the import tax on photovoltaic solar panels, announced by Brazil in 2023, puts at risk the installation of 18 GW of solar plants, responsible for 540 thousand green jobs.
