How much does a solar battery storage system cost?

Most solar battery storage systems cost \$10,000 on average, with most ranging between \$6,000 and \$12,000. Prices range from \$400 for small units to over \$20,000 for larger systems. Key cost factors include battery type, capacity, installation labor, and additional equipment.

How much does a solar battery cost?

A fully-installed 13.5 kWh solar battery costs \$13,500 on average, after claiming the 30% tax credit. This price can vary from project to project as there are many factors that influence battery storage costs. Update: The homeowner-claimed tax credit for home battery storage is only available until the end of 2025.

Can solar panels and batteries save money in California?

Pro tip: In California, homeowners combining solar panels and batteries can save up to \$10,000 with SGIP and federal incentives together. The type of battery you choose impacts both the upfront cost and long-term value. Here's a 2025 comparison by chemistry:

Are solar battery installations cost-effective?

There are many financial solar incentives and rebates available to make solar battery installations more cost-effective. Most importantly, home solar and standalone energy storage systems at least 3 kWh in capacity may qualify buyers for a federal income tax credit (ITC) worth 30% of total project costs.

The cost of solar battery storage depends on several factors, like the system's size, capacity, and brand. With so many options available, it can feel overwhelming to figure out what fits your budget and ...
