The above combine was contemporary with the late 40 which was a true Oliver combine design and used till the Cockshutt combines appeared in around 63 with the 430 and 431 and the ...

Solar panels can be integrated into various building components, such as facades or railings. The selection of suitable solutions should align with the design requirements, energy generation goals, ...

From your previous posts, your first combine is a 1989 9500, which has 190 rated HP. The 1988 7720TII will have either 145 or 165 opt. HP. Both have the 466 ci engine. Both machines are ...

Discover how solar panels can transform architecture with this guide for architects. Learn about compliance with Local Law 97, design tips, financial incentives, and innovative solutions to overcome ...

Architects and builders: learn how to seamlessly integrate solar energy into your designs for smarter, greener buildings.

Demo'd a 7010 today in dry conditions harvesting durum with a 36 foot honey bee head. What a beautiful cab, and a very nice monitor (it was the AFS 200). I really enjoyed how you could ...

In this article we discuss the integration between energy innovation and architectural design: PV panels blend with the building where they are installed, looking towards a shared future made of functionality ...

So the big reveal of the new T series is out I see. Big ? improvements like an auger extension you can order from factory, rotor reverser, one side panel made out of 2, new decals T ...

Discover the comprehensive guide to Building-Integrated Photovoltaics (BIPV), covering types, benefits, challenges, and future prospects. Learn how BIPV systems enhance energy ...

How to combine photovoltaic panels with buildings

Uncover how buildings become power stations with photovoltaic systems. Explore their benefits, types, design integration, and more in this comprehensive guide.

Building-integrated photovoltaics (BIPV) involves seamlessly blending photovoltaic technology into the structure of a building. These PV modules pull double duty, acting as a building ...

If you stand at the left side of the combine and have the rear plastic covers removed, look at the separator grates, where they are bolted to the top rail. (Don't forget to remove the separator ...
